

Asthma

Chart Review Summary

PROJECT AIM STATEMENT

To develop an infrastructure designed to improve the quality of asthma-related care provided by a general pediatric practice. This will include providing staff education, incorporating a quality improvement process and data collection system, and at least 4 quality improvement cycles over a 12-month period resulting in a 5% improvement in at least one critical asthma-related measure.

PROJECT METRICS

Criteria: Patient age between 5-21 years presenting for an asthma-related visit

- Documentation of asthma severity and control
- Appropriate follow-up care and education
- Prescription of inhaled corticosteroids
- Documentation of an Asthma Action Plan and transmission to the school
- Influenza vaccine
- Spirometry results
- Tobacco exposure
